Harrison

n:

ed Mr. Harrison a 83 year old with seizures.
having seizures December of 1981 and he has
periodically since that time. The wife
s them as December of 81, June of 82 times one,
82 times three, August of 82 times one and
of 83 times six. The seizures have always been
l. She describes them as jerking starting with
cream lasting several minutes. On one occasion
s urinary incontinence. There is no warning
er in the interim period before he goes to
d he feels well the next day. With the last
he did hurt his back, he has had no other
during these spells. He has had no tongue
He has been on no medication. There has been
y of head injury, stroke, or loss of
sness otherwise.
